User Case Story:
- User wants to find a recipe for sweet treats.
- User wants to utilize that recipe to create their own dessert

Assumption:
- User knows what sweet treat they want to make
- User knows where to search their recipes on
- User knows what resources to find their recipes on

Steps:
- User searches for their recipe
- User clicks on the link

Variable Interactions:
- User analyzed the recipe
- User uses that recipe to create their dessert
- User can alter the recipe to their own taste (recipe is there for a guideline)
